MINING, BUSINESS AND STOCKS.

HUBBARD LEASE HAS A DIVICEND READY

Lucky Boy Property Promises to Yield Production of Twenty Thousand Dollars a Day.

A third dividend of \$50,000 is expected to be announced within a day or so from Chicago, the headquarters of those who control the Hubbard on the Lucky Boy at Hawthorne. The last dividend of \$50,-Hawthorne. The last dividend of \$50,000 was paid on April 15, and the third
is about due, the plan of the company
being to declare two dividends of \$56,000
twice a month as long as the present
operations and net production continue.
The production at this time is said to
be in the neighborhood of \$7,500 gross a
day. Most of the shipping ore is being taken from the 180 and 300-foot levels, and delivered to the dump at the
mouth of the canyon at 180-foot level,
which is on the old Bodle road. Supt.
Kendall is sinking rapidly and was Kendall is sinking rapidly and was reported to have reached a depth of 485 feet. He will continue to 450 or 500 feet, and will then begin stoping on the mammoth ore bodies opened up. From the 300 to the 435-foot levels there is already opened up 135 feet of high grade ore reached by upraises and stoping, and the lower level will furnstoping, and the lower level will turn-ish a tremendous supply for shipment. It is anticipated that when the lower stopes are opened up the production will be easily 200 tons a day, or in the neighborhood of \$20,000 every 24 hours.

MARKET IMPROVING FAST.

Heaviest Day of the Week-Iron Blossom is Feature of the Exchange.

In sympathy with the marked im provement in metal prices, stocks on the exchange began moving this morning. Although there were no new favorites.

Although there were no new favorites, prices in most cases continued an upward course. The sales showed that conditions are again shaping themselves for a bull market.

The story that negotiations have again opened for the sale of the control of the Bingham Amalgamated property has falled to put the stock up, although it readily sold at 16½ cents today. Columbus Consolidated is proving stronger than it has been in the past two weeks and is again getting back close to the \$3 mark.

Iron Blossom was again the feature of the market and is getting back nearly as strong as before the slump that carried the price down to \$1.42½. Today the stock reached another high record and sold as high as \$2.30. As it is understood that nothing of importance has happened at the mine the physical condition is not believed to be the cause of the sudden change in price. It is believed by most of the brokes that

condition is not believed to be the cause of the sudden change in price. It is believed by most of the brokers that the change for the better is a reaction. Mason Valley continued to sag today and during the morning session sold weak at the close at \$2.85, drepping 10 points from the opening quotations. Ohio Copper is beginning to take on new life, although the sales are small. Beck Tunnel is coming back to its own again and was selling at 56 and 57 cents today.

own again and was senting to the force of the curb market Montana was offered at 20 cents and was sold for 15 cents. Eureka Swansea Extension was subject to the central subject of the sold at 19 cents. Bingham Central Standard received a bid of 22 cents. Welmer Copper was offered at 5 cents. Governor received a bid of 75 cents and

Emerson Heights Sales

The new addition at corner of 11th South and 14th East Streets, advertised in the "News" by Cannon & Cannon, and George M. Cannon Company, is in the hands of the surveyors preparatory to the extension of the city water mains and the laying of cement sidewalks. The arms named reports the sale of 27 lots already. Some purchasers have bought as an investment and others by way of improvement.

ENORMOUS TONNAGE FROM THE ELY MINES

Month of April Shows Millions of Pounds of Copper Produced at Nevada Camp.

Between 4,000,000 and 4,500,000 pounds of copper, with probability that the latter figure will be the nearer to the mark when the month's reports are

ter figure will be the nearer to the mark when the month's reports are figured out, were made by Nevada Consolidated and Cumberland Ely During April, says the White Pine News.

These figures are approximated from the number of cars of ore shipped from the number of cars of ore shipped from the number of cars of copper bullion shipped from the copper platform. Also estimate is made from the number of cars put on the concentrator trestle, these showing that exclusive of the reserve in the bins the concentrator handled above 120,000 wet tons during the month, a splendid record, particularly so in view of the fact that during the month the six sections of the mill were overhauled, one at the time. This work will be finished in the next few days and will enable the handling of a still larger tennage during the present month.

Shipments from the mines during the month averaged about 80 cars a day, 4,400 tons, a day or about 132,000 tons for the month, the record production for any single month in the eleven that production has been underway. Of this total about 8,000 tons of carbonate ore was shipped to Garfield for the use of the smeller there. The balance either went through the McGill concentrator or is in the bins there. Nevada Consolidated from Copper Flat produced an average of better than 50 cars of ore a day, the balance coming from Cumberland Ely's Veteran mine. This month 5,000 tons of ore may be looked for from the mines. The increase will be from Copper Flat steam shovel operations, as Cumberland Ely is working up to the capacity of its concentrator sections, while Nevada Con's newer sections are picking up a little more ore daily with the aid of the second deck of Wilfleys and the additional Garñeld mills.

ADDING NEW UNIT.

ADDING NEW UNIT. At the concentrator marvelous progress is being made with the erection of the equipment of the fourth unit. The work will be finished by the Hughes Construction company in less than half the time required for previous units and at a great deal less cost. The job being done is not only rapid but is as well commanding the admiration of those familiar with this sort of work for its thoroughness.

those familiar with this sort of work for its thoroughness.

Under the direction of Mr. Hughes and Mr. Barker of the Hughes Construction a splendid force of men, excelled by none that was ever on McGill ground, is making a record that will compare with anything before done in the country in concentrator erection. At the rate this work is going, the fourth unit will be taking ore early tion. At the rate this work is going, the fourth unit will be taking ore early in June, when production of ore from Copper Flat for Nevada Con.'s end of the mill will have to be increased about 1,200 tons a day, a performance that the steam shovel ground is ready for at any time.

OPENING ELY AMALGAMATED. Indications Are That Property Will be

Steady Shipper This Year. Ely, May 5.—J. F. Brim, managing director of the Ely Amalgamated Mining company, owned by Salt Lake and Provo people, whose property lies north of the smelter, was a visitor in East Ely yesterday. In an interview he stated the property was looking much better than he expected to find it.

According to Mr. Brim, the ore body which was opened up on Stormberg claim several days ago continues to improve and is getting much cleaner with depth. Another strike was made a few days ago on the Nevada Norther claim, which promises to make the pro-perty a large shipper before the sum-mer is over. The ore is found near the contact in a ledge 10 feet wide, with good mineral showings all through, Mr. Brim expects to see the ore in place when the new shaft is down about 50

President J. D. Murdock is expected shortly and upon his arrival the future policy of the company will be determined. At the present time a surveying party is at work on the property and application will soon be made for

UNITED STATES MEETING.

Secretary F. W. Bachelder is sending announcements to the stockholders he United States Smelting, Refining of the United States Smelting, Renning and Mining company, announcing the holding of the annual meeting of the company at 2 o'clock Wednesday afternoon, May 19, at 95 Exchange street, Portland, Me. At the meeting five directors will be elected to serve a term of four years and a clerk will also be chosen for the corporation. This will mean that a new director will be chosen for the place left vacant by the withdrawal of Charles D. Evans from the corporation. For the first time in the corporation. For the first time in several years the meeting is expected to be a peaceable one in which the usual policy kickers will not be pres-

ent.

Just who will be chosen for Mr.

Evans' place is not known, but it will
be someone in sympathy with the present policy of the company.

GETTING OUT SHIPPING ORE. Although work at the Bingham Central Standard property has been plodding along for some time the company is now rounding things out to make shipment. One of the leasers on the property is getting considerable good ore out of the Ben Dayls tunnel which is in over 900 feet. If is understood that some good ore bodies have been blocked out in this tunnel and that as soon as the work tunnel and that as soon as the work has advanced a little further some good shipping ore should be regularly taken out of this tunnel.

The Mountain Mayd tunnel has been

in ore for the past 200 feet and will shortly be under the old Whitley tunnel. It is a matter of but a few hundred feet before this is reached. The tunnel is now in a distance of more than 1,000 feet and there is a full

CONCENTRATES.

Earle E. Carley, a prominent New York business man is the guest of Samuel Newhouse for a few days. John A. Kirby, general manager of the Pioche King and also heavily interested in the Pioche Metals Mining company, has gone to Pioche where he will look over the work being done on both properties.

It is understood that the Boston Consolidated produced copper for the month of March at a net cost per pound of 10.51 cents. The net cost of the copper from the sulphide ores, after deducting all freight, refining and selling charges, was \$8.86 cents a nound.

The Scott Hill Mining company of Park City has been formed to take overe the bond and lease on the overe the bond and lease on the Brown group of claims at Park City recently operated by the Copper Apex mining company. W. D. Lewis is president of the company, James Byrne, vice-president and S. L. Raddon, secretary and treasurer.

R. Anderson, vice president of the Golden Reef mining company of Elsinore, was in the city yesterday look-ing after the interests of the company, It is probable that this company will be listed on the exchange within a short time. The mine at present has 12 feet of ore on the 143-foot level, where the vein is being crosscut, that runs from \$35 to \$70 in gold and lead.

The East Tintic Terminal Mining The East Tintic Terminal Mining company filed its articles of incorporation today with the secretary of state. It is capitalized for \$100,000 divided into shares of ten cents each. The company has several claims in the East Tintic Mining district. John Bestelmyer is president, Wilford F. Giles, vice-president and Royal T. Barney secretary and treasurer.

W. C. Marshall, who is mining in the Four Mile district, has returned home. He says that he is sinking a number of shafts on the various claims. Two shafts down 45 feet and 800 feet a part are in identically the same ore. The Utah Mines Investment company in the district is driving a tunnel. The people under Walter James are busy and the Beaver City people headed by Rasmussen have a fine showing of copper-gold ore that runs \$50 a ton.

copper-gold ore that runs \$50 a ton. From Goldfield comes the news that George Wingfield and associates have secured an option on the controlling interest on the Nevada Hills property at Fairview and intend to consolidate this company with the Fairview Eagle property, which adjoins it. The two properties are the only ones at present being worked in that camp. It is understood that the option was secured on \$600,000 of the 750,000 shares of issued stock. Those most heavily interested in this property which has paid \$373,716 in dividends.

A DISCUSSION.

Blood Atonement and the Origin of Plural Marriage.

A pamphlet containing over a hundred pages, has just been issued. This brochure contains a discussion on the questions quoted, between Elder Joseph F. Smith, Jr., and Mr. Richard C. Evans, the latter gentleman begin second counselor to the present of the "Reorganites." The questions are entered into exhaustively by both sides, and a great deal of valuable information is given. Elder Joseph F. Smith, Jr., shows by historical data and incontrovertible deductions that the position of his opponent is untenable.

Post paid to any address, 20c.

DEALINGS LARGE, CHANGES MIXED

New York, May 5.—The opening stock market showed great irregularity today but the mixed changes were small in all cases. Dealings were on a large Reading declined % and Consolidated Gas 14. American Tobacco pre-ferred advanced 35.

Strength in Union Pacific led a rally in prices. Support was extended to Read-

Strength in Union Pacific led a rally in prices. Support was extended to Reading and it railied 14 with a good sympathetic effect elsewhere. Union Pacific St. Paul, American Tel. & Tel., American Tobacco preferred and U. S. Rubber first preferred were lifted a point above yesterday's closing, Chesapeake & Ohio 1½ and New York Air Brake 2.

Active solling for both accounts began later in Reading and Union Pacific, which depressed the whole list sharply. Reading reacted to a point below yesterday's final price and Union Pacific fell 1½ from the top. Not much was left of the rise in other stocks.

The large selling orders which appeared when prices rose dampened the enthusiasm of the bulls. The decline was checked after Reading touched 13, but the rally was undecided. A few industrials, especially rainroad equipment stocks, rose sharply. Pressed Steel Car preferred gained 2. American Locomotive and Havana Electric 14, and Railway Steel Spring preferred 1. St. Joseph and Grand Island sold at a decline of 4. Bonds were firm.

Large inroads were made on prices again after midday with Union Pacific and Reading bearing the brunt of the selling. Union Pacific dropped to 18%, which was a point below yesterday's last price and 2 points under the highest of the morning. Reading encountered vigorous support at 151 again and prices railled. United States Steel Car, American Hide and Leather preferred and International Pump a point.

Business was dull in the afternoon, but a better undertone prevailed, Southern Pacific rose to 122 and responsible for a moderate hardening in the general list. A continued rise in U. S. Steel preferred got up to 1,13%. Delaware & Hudson was forced down a point. The market closed irregular and unsetted. Prices broke away from the support afforded by the strength in Southern Pacific rose to 122 and responsible for a moderate hardening in the general list. A continued rise in U. S. Steel preferred got up to 1,13%. Delaware & Hudson was forced down a point. The market closed irregular and unsetted.

WOOL.

ST. LOUIS. St. Louis, May 5.—Wool, strong, Territory and western mediums, 20@251; fine mediums, 18@22; fine, 12@17.

BOSTON.

Boston, May 4.—Interest in the local wool market centers in the new clip, and hidding by local dealers through buyers in the west directly with growers is very brisk. It is said that 90 per cent of the unelipped wool west of the Mississippi has already been purchased, and at least half in the east has been secured. Prices are very firm and tending upward. Quotations:

Scoured values: Texas fine, 12 months, 6002; tine, 6 to 8 months, 52264; fine rall, 4544.

California northern, 5369; middle country, 48450; fall free, 42.45; fall defective, 3263; valley No. 1, 48650.

Territory fine staple, 62465; fine mediums staple, 69652; fine clothing, 5862; fine medium staple, 63658; half blood, 6063; %-blood, 56658; auarter-blood, 50.53.

Pulled extra, 65670; fine A, 80463; A BOSTON.

90.53. Pulled extra, 65@70; fine A, 50@51; A supers, 55@59. LONDON. LONDON.

London, May 4.—The wool auction sales opened today with a large attendance of buyers, including many Americans. There was a strong demand for all sections offered. Crossbreds fine sold 5 per cent, and coarse 5@7½ per cent and occasionally 15 per cent over last series. The American buyers paid full prices for all suitable grades, and their purchases for the day numbered 500 bales. A few merinos were offered and realized 5 per cent over the previous sales. Cape of Good Hope and Natal stock showed an advance of 7½ per cent. The total offerings today were 11,670 bales.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago, May 5.—A new record mark for the season for wheat for May delivery was recorded today when that option sold at 1.29½. Other deliveries also made sharp gains from yesterday's closing quotations, July advancing 1 cent above the previous close to 117. Trade was active and general with shorts and prominent commission houses leading buyers. Continued dry weather in Kansas and Nebraska was the chief bullish influence. The market opened irregular with prices ½ lower to 1 cent higher. May being at 1.28 to 1.29, and July at 1.5½ to 1.16. Within 15 minutes May had advanced to 1.29½; while July jumped to 1.17. Offerings in the pit seemed to be entirely inadequate to the demand.

Corn developed considerable strength early in the session on the depleted stocks of corn in store here. The bulge in wheat also helped to strengthen the market. Prices at the start were a shade lower to a shade higher, July advanced to 65%.

May oats advanced more than 1c.

lower to a shade higher, July being at 65 % to 69. Later July advanced to 69%. May oats advanced more than Ic. during early trading. Opening quotations were % to % lower owing to seling brought out by improved weather conditions. May being at 55% and July at 49% to %. During the first quarter of an hour May advanced to 57% and July to 50%.

Provisions were quite and easy. The market was bearishly affected by liberal receipts of hojs at nh western packing centers. Prices at the opening were unchanged to 5c. lower.

Wheat—The market was very nervous during the last half of the day but developed considerable weakness late in the session, the deferred futures being especially heavy. After selling at 1.17%, July declined to 1.15% and May declined to 1.28. The close was weak with July off 140% at 1.15% 24% May was unchanged at 1.28.

Corn—The close was about steady with July ½ higher at 69% %.
